

“OpenShift by Red Hat lets our new Cloud AppAgile platform speed up provisioning by up to 6 months.”

**STEFAN ZOSEL**  
SALES DIRECTOR, APPAGILE,  
T-SYSTEMS

As a global IT services and consulting company, T-Systems needed to help its customers across multiple, diverse industries make apps happen in the cloud. But when it took months for traditional IT to set up their physical infrastructure, the company looked for something more innovative, something more cutting-edge.

#### AHEAD IN THE CLOUD

T-Systems found the solution in open source. With OpenShift Enterprise by Red Hat® – the innovativePaaS that won InfoWorld’s 2015 Technology of the Year award – they built a standardized software platform that transforms legacy applications into real cloud applications.

#### SO WHY RED HAT?

“Red Hat uses open source to continuously further the development of OpenShift Enterprise. The same applies to the T-Systems solution, which enables us to develop innovations significantly faster.”

#### CASE STUDY

**T-Systems, Germany’s largest IT services company, built the innovative new Cloud AppAgile on OpenShift Enterprise by Red Hat®, the award-winning PaaS.**

**Now its customers can spend less to upgrade legacy software to the cloud – simply and securely.**

#### THE CHALLENGES

- Build a software platform to upgrade customers’ legacy software for business applications in the cloud.
- Offer application development and provisioning securely across multiple, diverse industries.
- Reduce costs and provide flexibility for programming languages, frameworks, and runtime environments.

#### THE SOLUTION

OPENSIFT ENTERPRISE BY RED HAT

An on-premise, private Platform-as-a-Service (PaaS) solution offering that lets you deliver apps faster and meet your enterprise’s growing application demands.

#### THE BENEFITS

##### Customization & Flexibility

T-Systems can offer customers their choice of development and integration tools.

##### High agility & scalability

Cloud AppAgile can provision integrated system solutions in just days instead of months.

##### Faster app development

T-Systems customers can now develop new applications 40% faster.
